

Our pharmacy provides several services that will assist you in maintaining a good state of health. We would like to remind you that we offer a complete line of vaccinations, administered by certified personnel, and most of which are covered by your prescription insurance plans.

In addition, our pharmacy also offers a free personal and comprehensive review of your current prescription and over the counter medications. This review will assist you in revealing possible side effects, drug interactions, suggestions for preventive care, and information that can provide you with relevant and significant prescription drug cost savings.

These programs are our way of thanking you for helping us to become one of the leading independent Pharmacies of the North Shore and we look forward to serving you now and in the future.

Sincerely
